TRADING WAS LIGHT

Few Brokers There and Market Very Irregular.

A BAD BANK STATEMENT

The Loss of Oash Almost Three Times as Large as Had Been Predicted. Brooklyn Transit the Chief Sufferer.

(By Associated Press.) MEW YORK, Sept. 12.-Trading during to-day's brief session of the stock mar-ket was so light and otherwise common-place as to call for little comment. Only ket was so light and otherwise commonplace as to call for little comment. Only
slight response was made to Lohdon,
which reported better prices for our securities, especially the Pacifics and
grangers, the features over there being
Union Pacific and St. Paul. Even the
steel stocks were easier abroad. The attendance of brokers on the exchange was
very small, and from the outset here the
market was narrow and frequist, early
quotations showing advances and declines
in about equal proportions. St. Paul
alone exhibited firmness at the opening,
although an easier tone was shown by
such issues as Pennsylvania and Roading.
The first transaction in steel common was
at a slight advance, which was snown by
such issues as Pennsylvania and Roading.
The first transaction in steel common was

The first transaction in steel common was
at a slight advance, which was snow lost,
while the preferred was allogether neglected. Atchison, the feature of the week
as to activity and strength, opened down
and sustained a material net logs. Refore
the end of the first hour the market tecame so listless that it could scarcely
be said to have either tendency or tone.
The bank statement, with a lors of cash
almost three times as large as had been
predicted, together with a furtiler expansion of the loan account, brought increased weakness all around, the chief
sufferer being Brooklyn Transit, which
made an extreme decline of 25-8 in spite
of a moderate increase of net income
over the previous year. The list closed
weak. Some comfort was derived from
the fact that the excess reserves of the
Associated Banks in the face of a firther drain upon their holdings is well
over \$15,00,000 as compared with shout
\$700,000 this same time last year.
United States new 4's advanced 1-4 per
cent, and the 2s 3-4 per cent, and compared with the closing call of last week.
Total sales of stocks to-day were 120,600 sharos.

(Special to The Times-Dispatch.)

NEW NORK, Sept. 12.—The opening of the stock market was steady about the fagures of the procession night's close and a little disappointing nylew of the strength shown in Loudon. The professional element was poorly represented on the floor, and even in the early trading there was an obvious disposition to wait for some such lead as the bank statement could give. There is some authority for saying that the heavy transactions in Atchison of Friday were largely of a manipulated character. Some investment buying in Norfolk and Western was reported.

There did not seem to be much stock in the market.

The action of the market in the first hour was rather disappointing and prices aaged on very moderate pressure. The commission house business was too light to have any inducence and London was hardly a factor.

Traders soid Sited common under the bead of Jacob Field. There is less talk in the stret of the passing of the next dividend, but the professional element evidently thinks that there is a weak bull account somewhere.

The Western element semed to have some St. Paul for sale on the report, and attacks a good deal of imperiance to the increased cost of conducting transportation, as shown in this and other reports. other reports.

Toe market closed steady at the lowest price.

MAMMOTH CRUISER

tendent Post stated that he did not anticipate any trouble as the result of the accident, and that he expected the ship to be gotten off at any time without being damaged. It was very hot here to, day and it is believed that the tailow maited and ran off the ways, causing the cruiser to stick instead of sliding off smoothly, according to the programme. It was reported that the stern of the ship had stuck in the mud, but this was not the case. There is plenty of water at the foot of the ways, and as soon as there is a tide low snough to cause the ship to glide down, it is expected that she will free herself from the ways with the assistance of the tugs.
